

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-17 (withdrawn)

Claim 18 (currently amended): A film comprising ~~at least one layer~~ two outer layers of amorphous or semi-crystalline polyester obtained from the condensation of a diacid component comprising terephthalic acid with ethylene glycol and a diol component comprising at least three carbon atoms, and ~~at least one~~ a middle layer of polyolefin, and further comprising a plane of symmetry which is parallel to said film, said symmetry applying both to the geometry and to the composition of said film, said film being for wrapping objects and being capable of substantially retaining its shape.

Claim 19 (previously amended): Film according to Claim 18, wherein the polyester is amorphous.

Claim 20 (previously amended): Film according to Claim 19, wherein the sum of the mass of the layers comprising the polyester comprises at least 20% by weight of the mass of the film.

Claim 21 (previously amended): Film according to Claim 20, comprising at least three layers, two of which comprise outer layers comprising at least the polyester and one of which comprises a middle layer comprising at least one polyolefin.

Claim 22 (previously amended): Film according to Claim 21, wherein the sum of the mass of the three layers comprises at least 80% of the total mass of the film and each of said three layers comprises at least 10% by weight of the total mass of the film.

Claim 23 (previously amended): Film according to Claim 22, wherein the middle layer comprises at least 60% of an ethylene polymer.

Claim 24 (previously amended): Film according to Claim 21, wherein the middle layer comprises 40 to 80% by weight of the mass of the film.

Claim 25 (previously amended): Film according to Claim 18, wherein the diol is cyclohexanedimethanol.

Claim 26 (previously amended): Film according to Claim 25, wherein the diacid component of the polyester comprises 70 to 100 mol% of terephthalic acid and 0 to 30 mol% of another acid chosen from isophthalic acid, naphthalenedicarboxylic acid and 1,4-cyclohexanedicarboxylic acid or mixtures thereof, and the diol component of the polyester comprises 2 to 99 mol% of 1,4-cyclohexanedimethanol and from 1 to 98 mol% of ethylene glycol.

Claim 27 (previously amended): Film according to Claim 26, wherein the diacid component of the polyester comprises 80 to 100 mol% of terephthalic acid and 0 to 20 mol% of isophthalic acid, and the diol component of the polyester comprises 25 to 40 mol% of 1,4-cyclohexanedimethanol and from 75 to 60 mol% of ethylene glycol.

Claim 28 (previously amended): Film according to Claim 18, further comprising at least one antiblocking agent and/or at least one antistatic agent and/or at least one release agent.

Claim 29 (previously amended): Film according to Claim 18, wherein the film has undergone printing and/or metallization.

Claim 30 (previously amended): Film according to Claim 18, having a thickness of from 10 to 60  $\mu\text{m}$ .

Claims 31-39 (withdrawn)
